√	Provide professional development programs to trainer teachers specifically in the use and application of technology	On-demand training webinars on the Employability Skills Program are available																				
√	Develop or improve or expand the use of technology	Many of the lessons integrate the use of online research. Using presentation software, creating Excel spreadsheets and other online tools are also incorporated into the program.																				
√	Initiate, improve, expand and modernize quality vocational and technical education programs	The RealCareer™ Employability Skills Program uses hands-on activities and real-world applications to teach students 20 soft skills they will need for success in college and career. This engaging, easy-to-implement program may be used to expand and improve any Career & Technical Education course as an entire employability skills unit or to supplement an existing program.																				
√	Provide services and activities that are of sufficient size, scope and quality to be effective	The Employability Skills Program covers a broad range of soft skills over 19 different lessons. The program includes a comprehensive teacher guide, student workbooks, slide presentation and workplace scenario cards.
