

How to Perform a Weld

1. Launch guideWELD VR

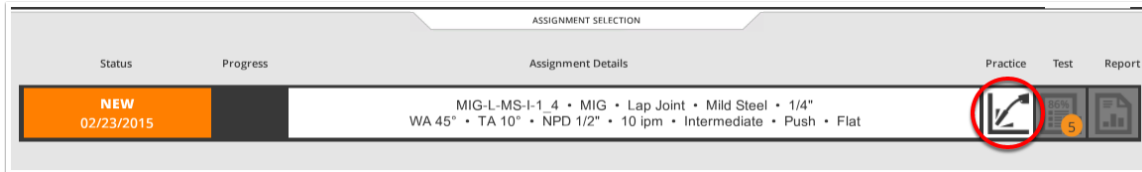

2. Click PLAY at Configuration Screen

3. Enter Student Credentials, click LOGIN to continue

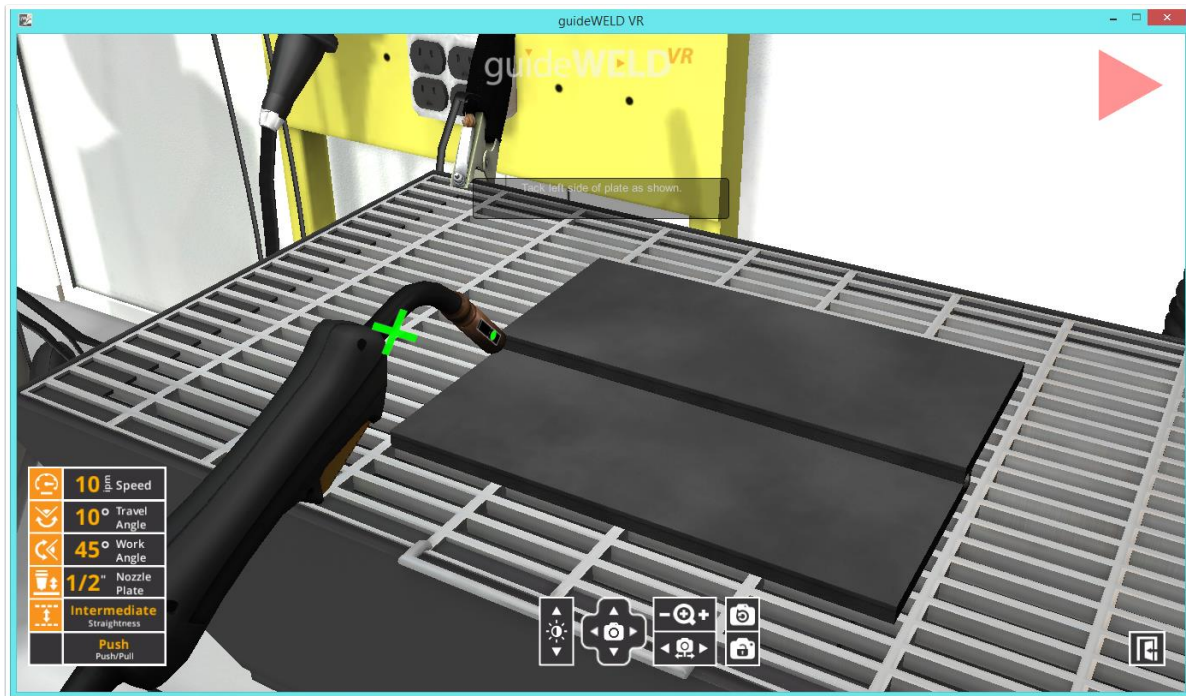

4. Click Practice on an Assignment to Weld

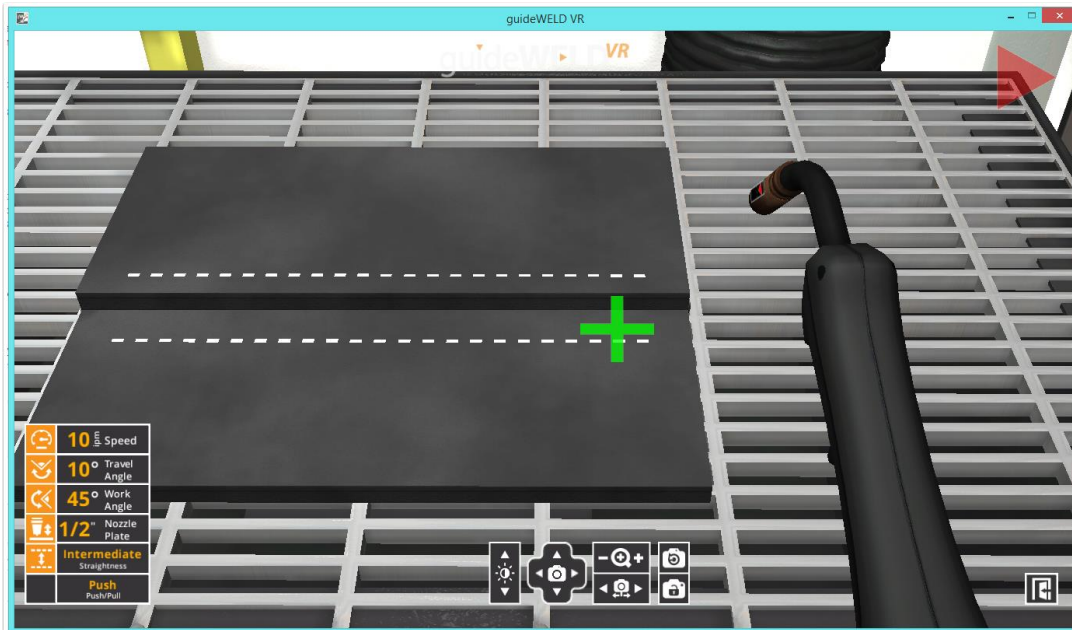

5. Tack as Shown on Screen

The first time you enter a guideWELD VR assignment you will be shown a short video of the player putting on their personal protective equipment. That video can be skipped by pressing any key. You will next encounter the tack screen. Tack as shown onscreen for the coupon by pulling the trigger and releasing once you have the gun in position.

6. Weld in Virtual Welding Environment

After successfully tacking you are now in the virtual welding environment. Pick up the gun and perform the weld according to the WPS specifications.

7. Saving the Weld

Click the SAVE icon above the EXIT icon in the lower right to save the weld and to look at the results. The SAVE icon only appears when you have welded 50% of the coupon.

8. View Results

Click the BACK arrow to go back to the Assignment Selection screen to select another weld to perform or to exit the software.
